

JOB TITLE: Senior Software Engineer (Full Stack)
DEPARTMENT: Development Team
LOCATION: London
REPORTS TO: Principal Engineer
RESPONSIBLE FOR: NO DIRECT REPORT

Company Information:

essensys is the leading global provider of software-enabled platforms for the flexible workspace industry. The world's largest, most successful serviced office, coworking, science park operators and commercial real estate owners rely on essensys to power, manage, grow and scale their workspace business.

We're currently recruiting for a Senior Software Engineer to join our medium sized team. This position would suit a strong commercially minded experienced software engineer with expert level coding skills, who can translate user story requirements into solution designs; coding, testing and producing technical documentation.

What will you be doing?

You will act as a subject matter expert on the software architecture of essensys product solutions and provide solution designs for complex software deliveries. Some other duties include:

- To provide technical support to software developers
- To provide root cause analysis and remediation of system software problems
- Work with Principal Engineer to create, maintain and govern coding standards through code review
- Work in a highly collaborative fashion within the development team role modelling development best practice

The qualifications and skills you will need to be successful in this role:

- Minimum of 3 years' experience in a similar role
- Experience in modern web development technology stack including but not limited to JavaScript, ES6, TypeScript, React, SQL and NoSQL technologies
- Expert level knowledge of best practice in modern software engineering practices and methodologies including XP, ATDD, CI/CD pipelines, test automation and automated release management
- Demonstrate successes in the development of AWS native and cloud hybrid solutions on API-first, microservices target architectures and serverless frameworks
- Versatile technical experience leveraging Gitlab, Jenkins or AWS Code Pipeline to implement CI/CD automation
- Highly effective analytical, troubleshooting and problem-solving skills
- Have excellent interaction skills both verbal and written
- Have the willingness to go the "extra mile" to deliver timely solutions
- Be a quick learner and have the desire to learn new things

What we are looking for?

We are looking for the following aptitude and personal qualities

- Methodical approach
- Flexibility
- Impeccable attention to detail
- Work well under pressure

Company Compensation and Benefits:

- As an employee at essensys you will enjoy a competitive salary, 25 days holiday entitlement plus bank holidays and let's not forget, you will have your birthday off as we believe it's important to enjoy your special day away from work.
- You will also be automatically enrolled into our workplace pension scheme from day 1.
- Other benefits include healthcare, life insurance, corporate gym plan, just to name a few, as well as a wide range of professional development opportunities to support your growth with us.
- A full list of benefits will be provided on application.

Does this appeal to you?

If so and you want to work for a fantastic, expanding and exciting ProTech company, please forward your CV to hr@essensys.tech for the full job description, full list of benefits and more information about the recruitment process.
