Automated onboarding & offboarding

Occupier & space management

Digital infrastructure automation

Powerful APIs & real-time data

Want to realize the true value of your spaces?

Get up and running faster, limit time spent vacant, and attract and retain occupiers.

Weighed down by operational complexity?

Our software automates the management and delivery of digital services saving you time and money.

Want to deliver a consistent customer journey?

Create great occupier experiences at scale with instant connectivity, scalability and the seamless delivery of digital services.

Want to make more informed decisions, faster?

Get access to insights on network performance and occupancy portfolio-wide to inform and future-proof your strategy.

Trusted by the worlds leading Landlords and Flex operators

Designed for simplicity, built for scale

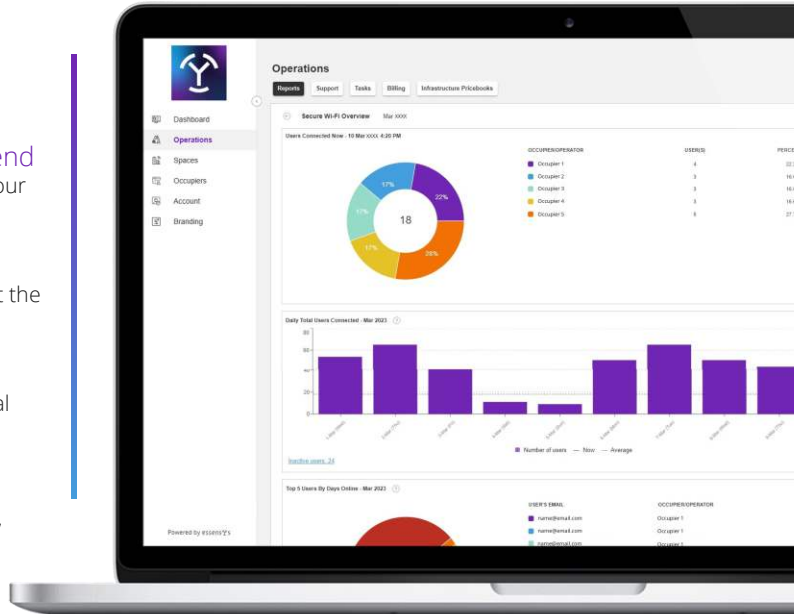

The essensys Platform

Deliver a consistent customer journey end-to-end
Provide a frictionless customer journey and deliver what your customers need when they need it.

Digitalize space operations, with instant results
Onboard customers and deliver digital services instantly, at the touch of a button.

Automate out operational complexity
Automate manual and complex tasks to reduce operational complexity, making your day-to-day simple.

Make more informed decisions, faster
Access insights on performance, occupancy and utilization, portfolio-wide, so you can make more informed decisions.

Easy occupier onboarding

Easily set up spaces and streamline occupier onboarding. Automate access to vital digital services, at the push of a button, through one central platform.

Wireless & wired networks

Quickly and easily provide secure wireless and wired network connectivity to occupiers. Set up instantly or schedule for the future. Allow self-service through our occupier portal.

Infrastructure management

Manage network infrastructure, private networks and bandwidth allocation through a simple user interface that can be easily used by non-technical staff.

Monitoring & insights

Access valuable insights on network performance, bandwidth consumption and more. Stay ahead of any issues and gain a deeper understanding of your operations.

Manage bookable resources

Meeting rooms, offices, desks and more can all be managed through one platform. A central source of truth for user authorization and charging.

Seamless access control

Control and manage access credentials centrally. No need for data entry into multiple systems. Automatically assign access rights during onboarding and remove rights at contract completion.

White-label mobile app

Provide your occupiers with an intuitive mobile app that enables them to book and access spaces across your locations. Branding is fully customizable and no complex integrations required.

Integrate with our open API

Our open API enables you to build the tech stack you need to deliver your digital strategies. Integrate and automate workflows across CRM, tenant experience, invoicing and more.
